4.1 Description of first aid measures

If swallowed	Wash mouth with water; never give anything by mouth to an unconscious person; get medical attention
If inhaled	Move to fresh air; if person is not breathing, give artificial respiration; get medical attention
In case of skin contact	Wash off with soap and water; remove contaminated clothes and shoes; get medical attention
In case of eye contact	Wash thoroughly with plenty of water for at least 15 min; remove contact lenses if present and easy-to-do; keep washing for several additional minutes; get medical attention
General advice	Get medical attention if you feel unwell; show this data sheet to the doctor in attendance

4.2 Most important symptoms and effects, both acute and delayed

No data available

4.3 Indication of any immediate medical attention and special treatment needed

5. Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media: dry chemical powder, water spray, fog or alcohol-resistant foam
Unsuitable extinguishing media: do not use water jet

5.2 Special hazards arising from the substance or mixture

Toxic gas such as carbon oxides, may form flammable heavy gas

5.3 Advice for fire fighters

Wear self-contained breathing apparatus for firefighting

5.4 Further information

Product is highly flammable; container may explode in case of fire

6. Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Wear safety goggles, lab coat, suitable protection gloves and boots; wash hands before and after use

6.2 Environmental precautions

No data available

6.3 Methods and material for containment and cleaning up

Cover spilled liquid with sand; use appropriate tools to put the solid in a convenient waste disposal container; keep container tightly closed for disposal; finish cleaning by spreading water on the contaminated surface and ventilate the room

6.4 Reference to other sections

For disposal: see section 13

7. Handling and storage

No data available

8. Exposure controls/personal protection

8.1 Control parameters

No data available

8.2 Exposure controls

Appropriate engineering controls

Use general hygiene procedures; use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits; if user operations generate dust, fume, or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit

Personal protective equipment

Eye/face protection Wear safety goggles (EN 166)

Skin protection Use proper lab gloves; gloves must be inspected prior to use; wash and dry hands

Body Protection Wear lab coat or other impervious clothes; type of protection equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace

Respiratory protection If necessary, use respirator tested and approved under appropriate government standards such as NIOSH (USA) or CEN (EU)
